The Art of Fine Living

Where design meets excellence, Belezza redefines luxury with an exquisite range of premium switches, crafted to elevate every space.

Our Design Philosophy

Design is more than just how something looks it's how it lives with you.

The inspiration behind this collection began with a simple question:

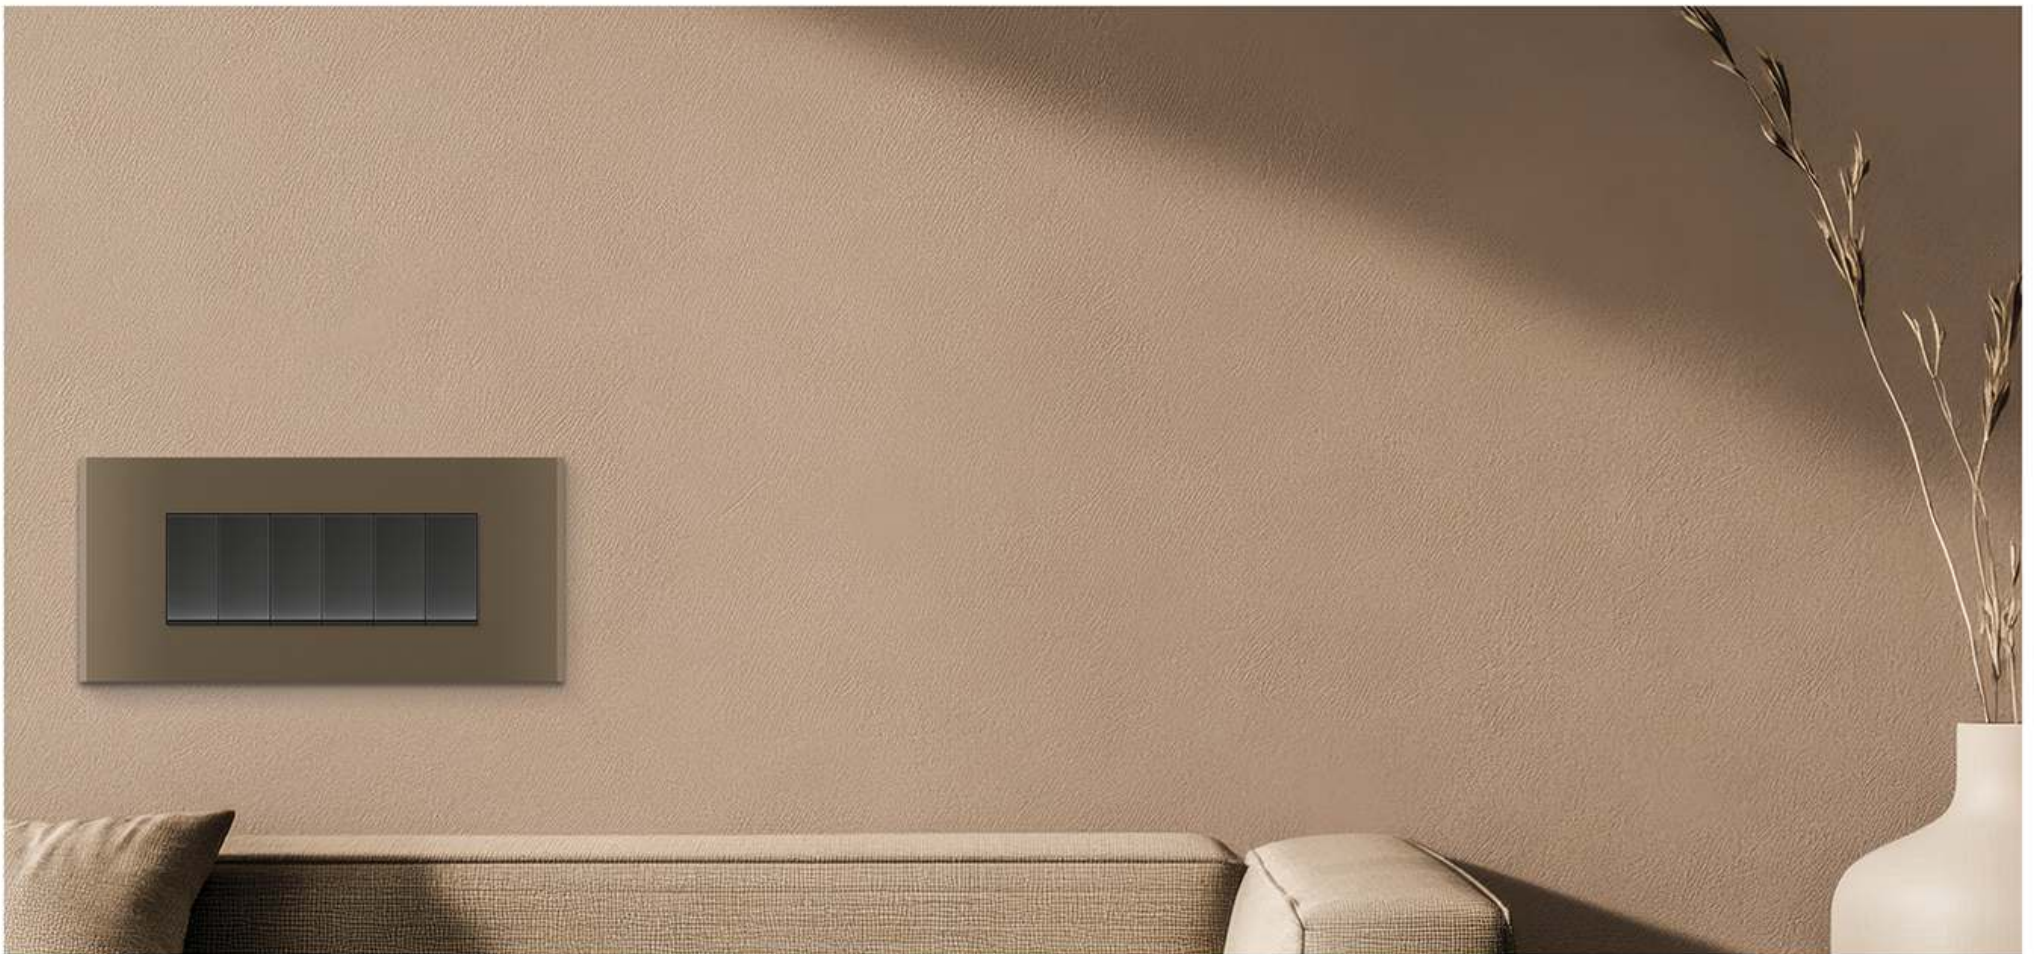

What if switches were crafted with the same attention to detail as your living space?

That question led us to explore the quiet elegance of natural forms, the balance of geometry and the subtle warmth of everyday living. The result is a design language that's minimal, yet expressive. Strong, yet refined. Every line, curve and material choice is intentionally crafted to enhance both function and feeling.

From the soft matte textures to the fluid rocking of a switch, every detail is made to blend in when needed and stand out when noticed. It's design that doesn't overpower it complements, completes and quietly elevates the spaces we call home.

WHY CHOOSE BELEZZA

We imagined a world where switches feel like part of your lifestyle, not just your walls. Where technology quietly protects and design gently enhances. With **belezza** each element has a purpose, from thermoset housing that offers peace of mind, to finely finished materials that reflect modern taste and timeless sensibility. This is not just about aesthetics or performance, it's about how a product can make you feel. Comforted by its safety features. That's the **belezza** promise, crafted with care and designed for life.

WHAT MAKES BELEZZA STAND APART

THERMOSET BACK HOUSING

Live terminations are encapsulated within a high-grade thermoset material enhancing insulation, minimizing heat risks and ensuring long-lasting electrical safety with every touch.

SLEEK YET RESILIENT FORM

Engineered to be as durable as it is elegant, Belezza is made for the modern lifestyle. Its slim, flat front brings a clean presence to your wall. The metal-reinforced base plate and sturdy front cover are designed to maintain their shape and finish over time.

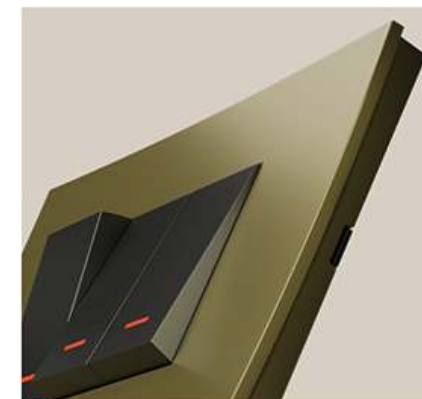

MATTE GLASS FINISHES

Why should glass always be glossy and reflective? Matte brings a refined softness and understated charm to interiors. Belezza glass plates blend matte and gloss finishes available in timeless black and white for a balanced, elegant aesthetic.

SIGNATURE CURVED PLATES

Breaking away from conventional flat designs, Belezza's signature curves add a graceful flow to your walls creating a distinctive design language all its own.

DESIGNED FOR THOSE WHO EXPECT MORE

Built to Last

Every component is built robustly with thoughtful enhancements to ensure smooth, optimal performance designed to perfection for comfort and complete user satisfaction.

Elegance in Every Detail

A truly well-engineered product is one that strikes the perfect balance between technical precision and aesthetic charm designed not just for performance, but to offer visual comfort, everyday ease and lasting satisfaction.

Design with Class

A great product is the result of machines, moulds, and skilled technicians working in harmony. Every component is precisely engineered and optimized to ensure exceptional performance, durability and a flawless finish that stands the test of time.

TECHNOLOGY

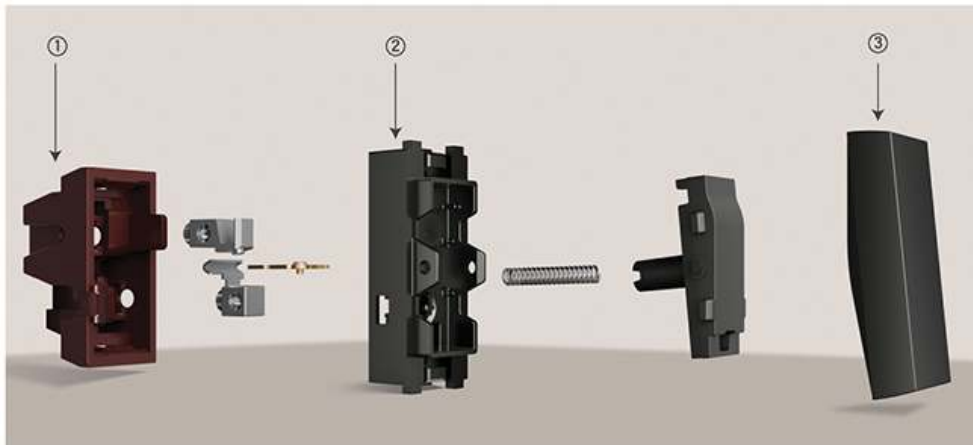

INSERT MOULDING

The base plate is metal-reinforced through insert moulding, where a strong polycarbonate (PC) layer is fused onto the metal base. This enhances structural strength and prevents any bending or warping over time.

THREE LAYER CONSTRUCTION

Each switch and socket is built using a three-piece construction - front, middle and back housing. This ensures safety, precise alignment, symmetric spacing and smooth, satisfying operation with every touch.

①

BACK HOUSING

Live metal components are encapsulated in heat-resistant thermoset housing for maximum safety.

②

MIDDLE HOUSING

Made of PC for perfect alignment, secure locking and strong insulation.

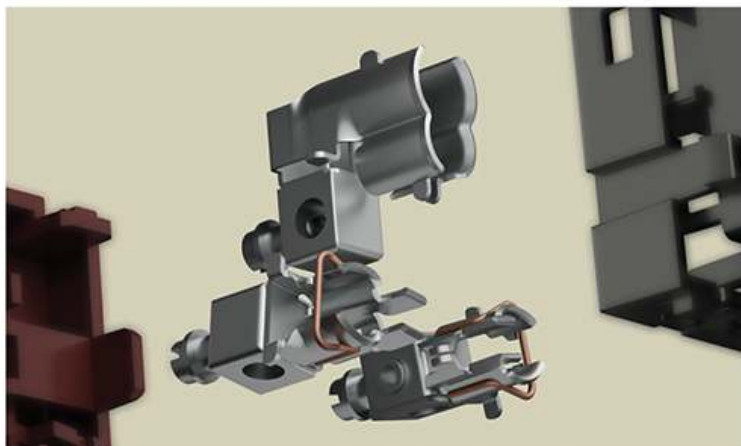

③

FRONT HOUSING

Firmly interlocks with the middle layer, ensuring a consistent, smooth user experience.

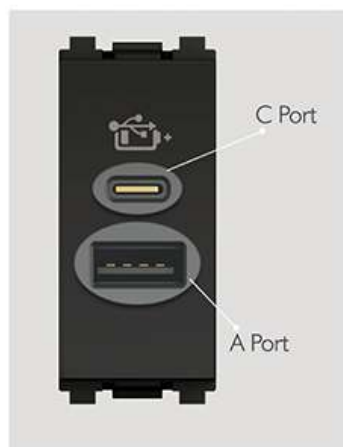

SILVER-BRUSHED BRASS TERMINALS

All live terminals and contacts are silver-brushed to significantly improve both thermal and electrical conductivity delivering long-term performance and reduced corrosion.

FAST CHARGING

18w / 3.1Amp dual-output charger with A & C ports, featuring QCPD technology for intelligent, high-speed charging.

Precision, Layer by Layer

Discover the invisible details that make all the difference crafted with purpose, built for life.

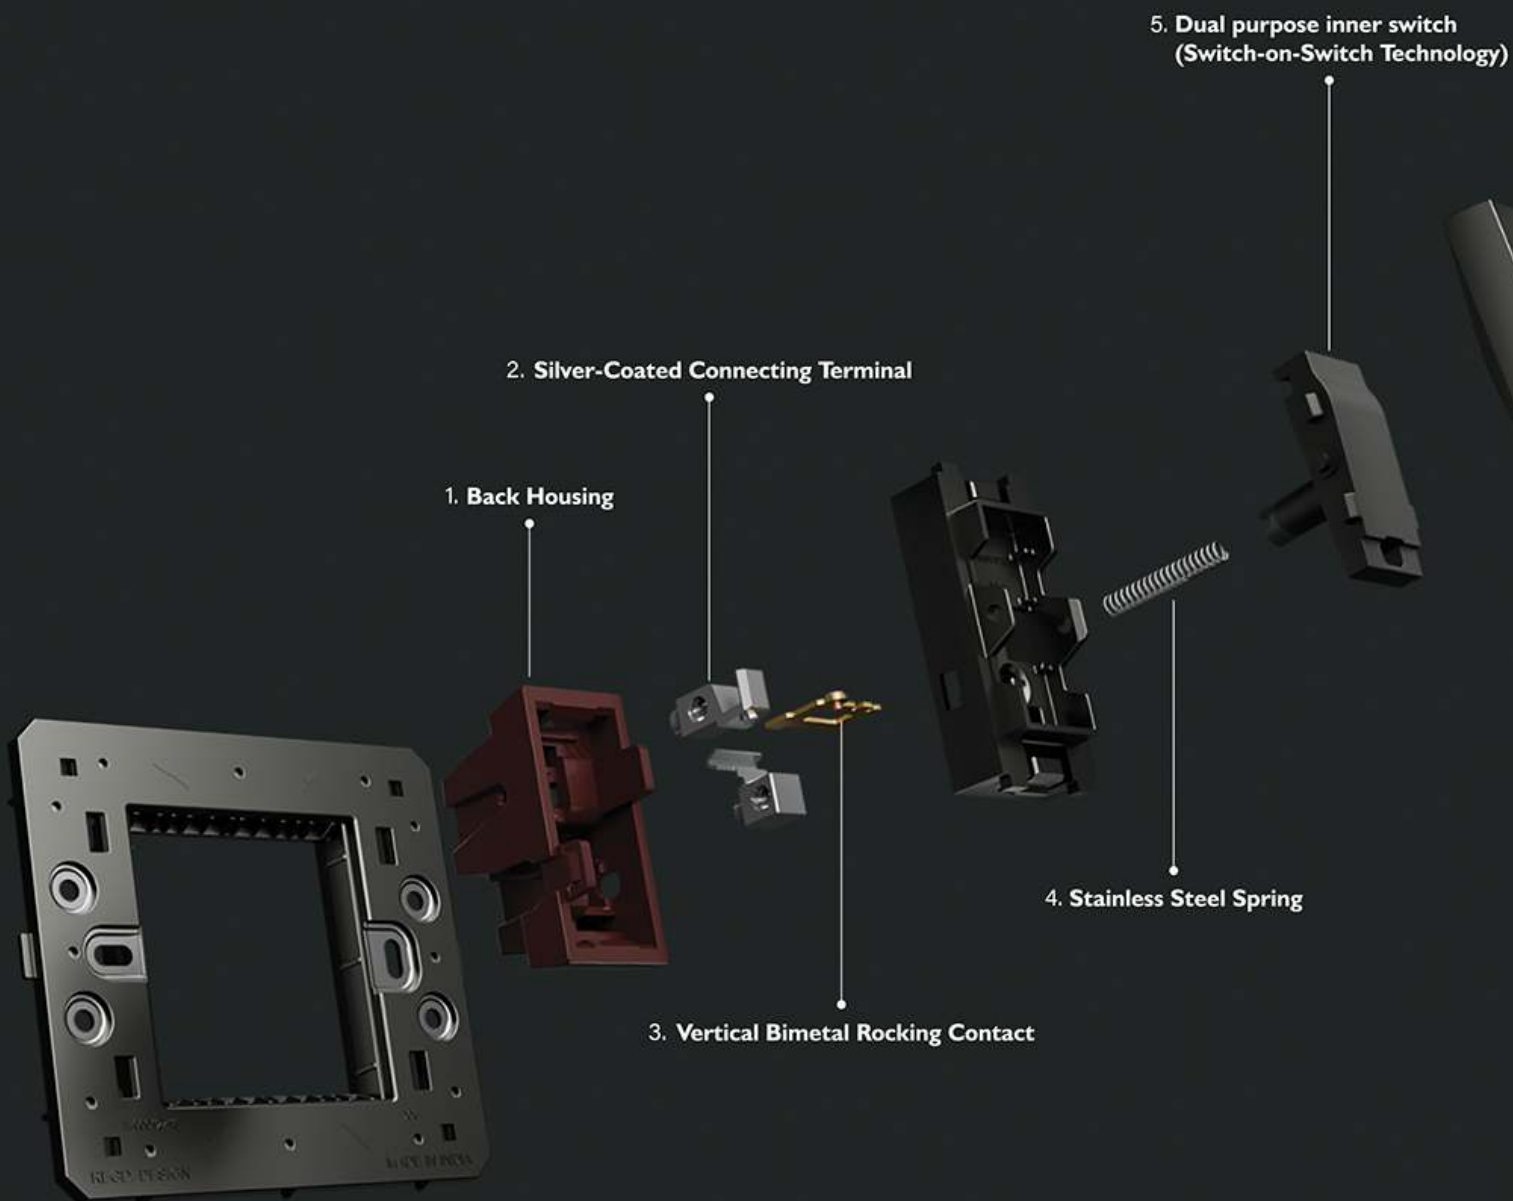

EXPERIENCE THE SWITCH

Double Protection. Double Safety.

Lifetime warranty applicable only on switches

Every component in our switch is designed to offer precise functionality, durability and an extra layer of safety inside and out.

- 1. Back Housing:**
Encapsulates live parts and offers excellent thermal resistance built to endure higher heat safely.
- 2. Silver-Coated Connecting Terminal:**
Ensures smooth current flow and improved thermal efficiency for long-lasting performance.
- 3. Vertical Bimetal Rocking Contact:**
Designed for perfect contact and higher heat endurance.
- 4. Stainless Steel Spring:**
Anti-corrosive and highly resilient, it supports consistent operation and long-term reliability.
- 5. Dual purpose inner switch (Switch-on-Switch Technology):**
Inner built in arc protector switch and user-interface switch provide an addition safety layer with every click.

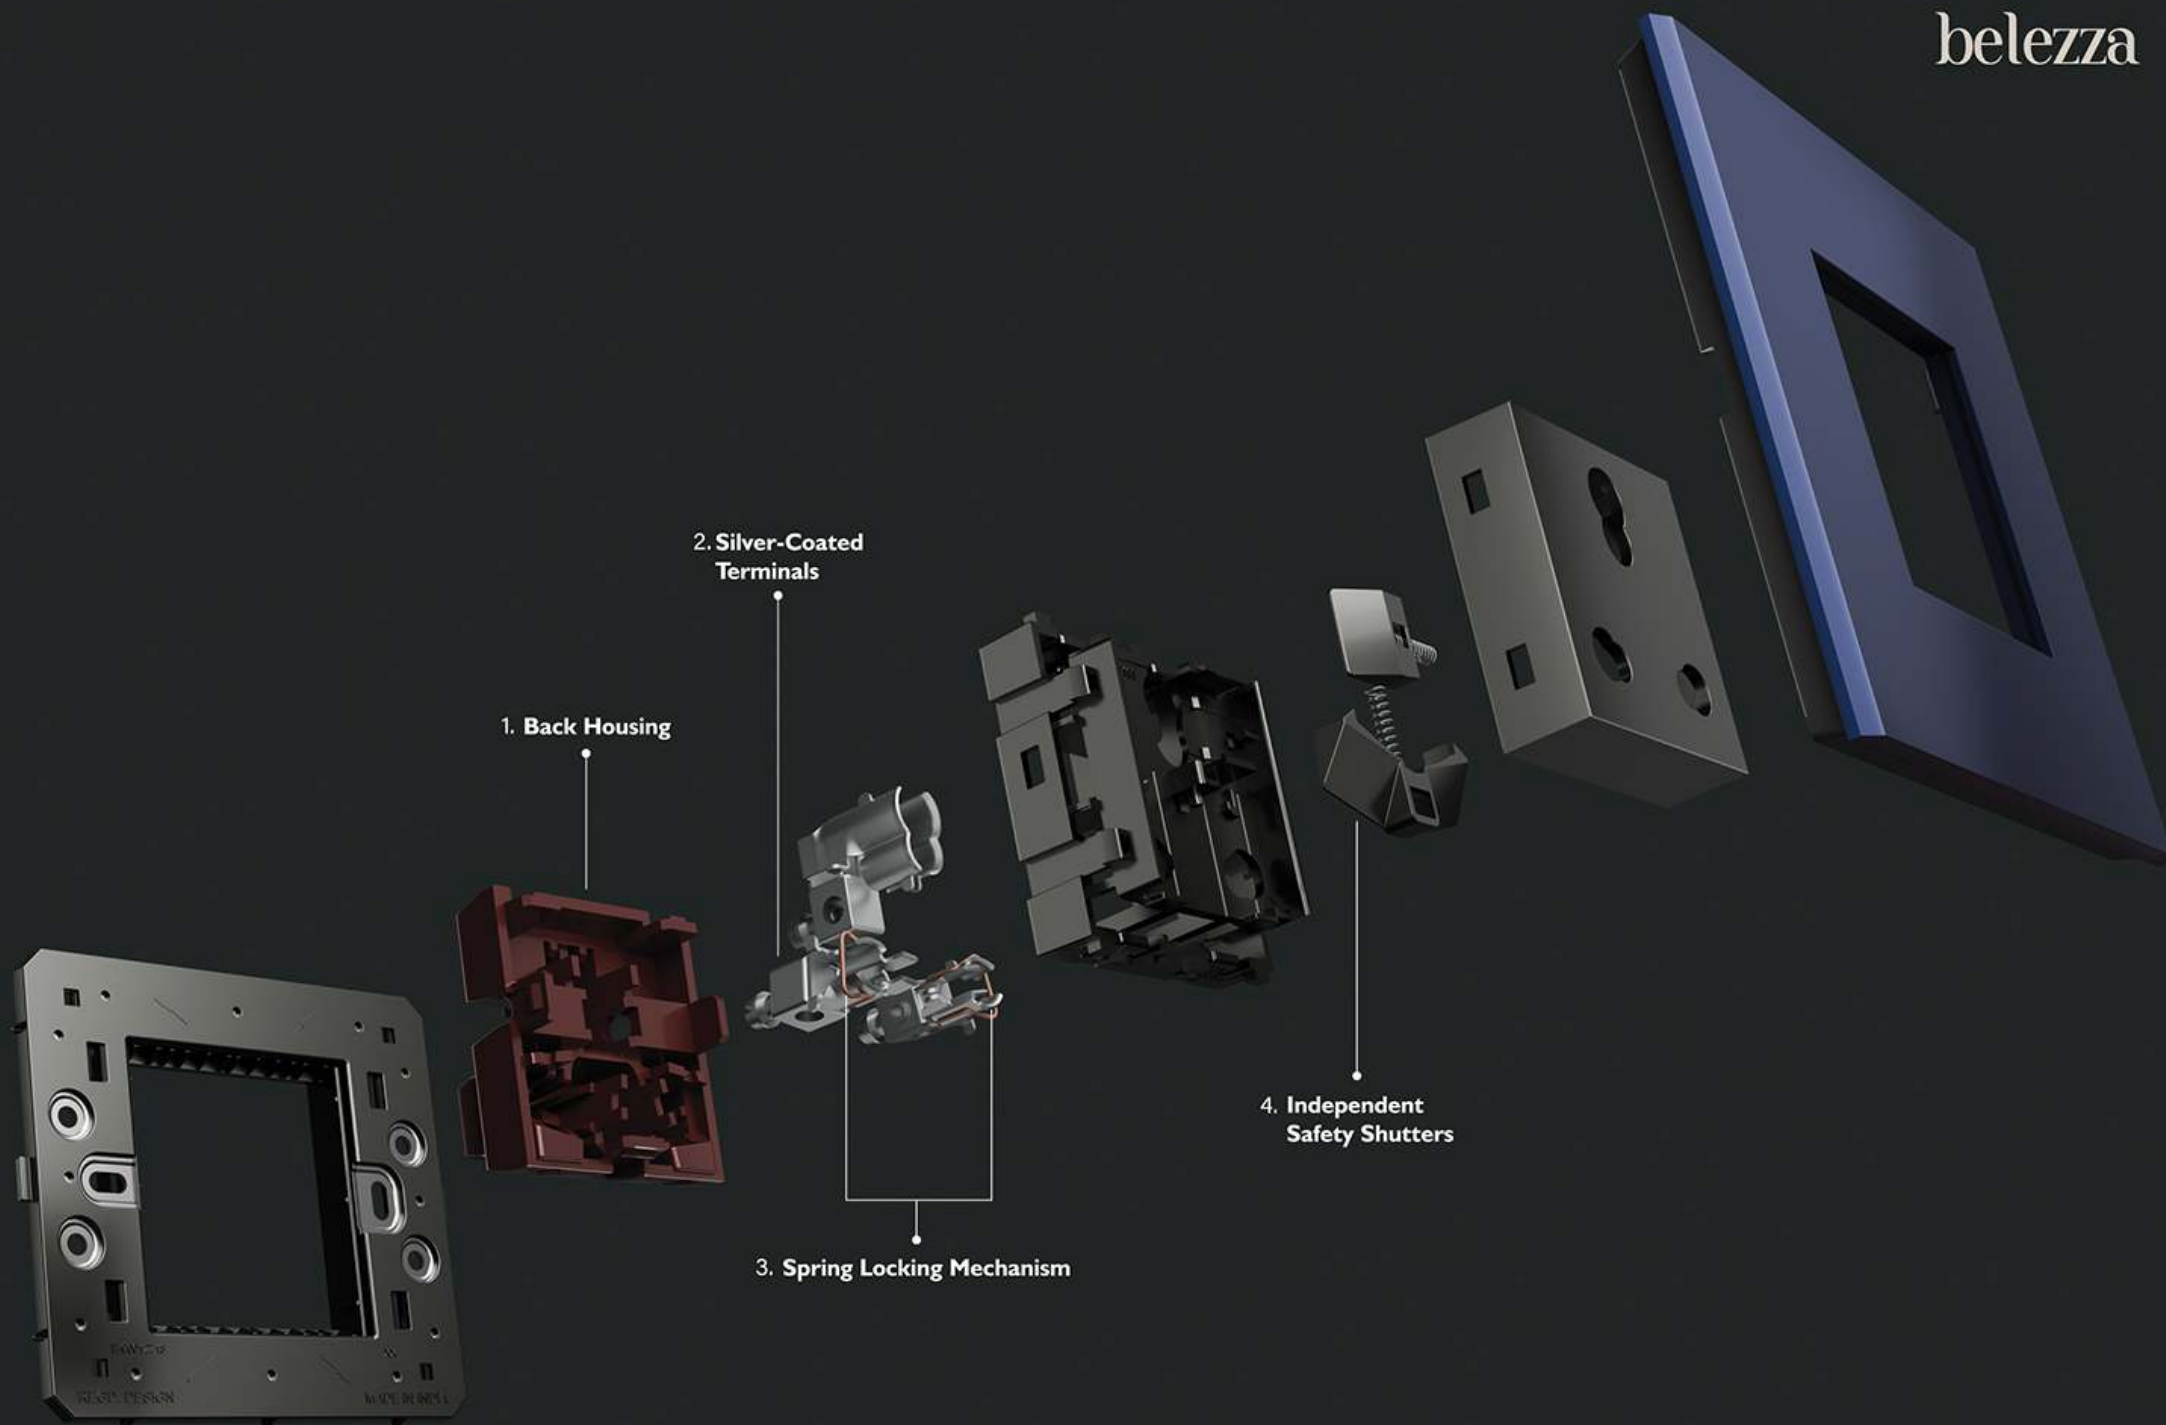

THE SOCKET SAFETY

Secure Grip. Safer Flow.

Engineered with intelligent detailing, every element in the socket is designed for safe, secure and smooth operation.

- 1. Back Housing:**
Encapsulates live parts and offers excellent thermal resistance, built to endure higher heat loads safely.
- 2. Silver-Coated Terminals:**
Terminals inside socket are silver coated which ensures faster current flow and low heat generation.
- 3. Spring Locking Mechanism:**
Provides firm grip on plug pins which prevent sparking and improves connectivity.
- 4. Independent Safety Shutters:**
Designed for smooth and secure operation of both 2-pin and 3-pin plug tops offering safety without compromise.

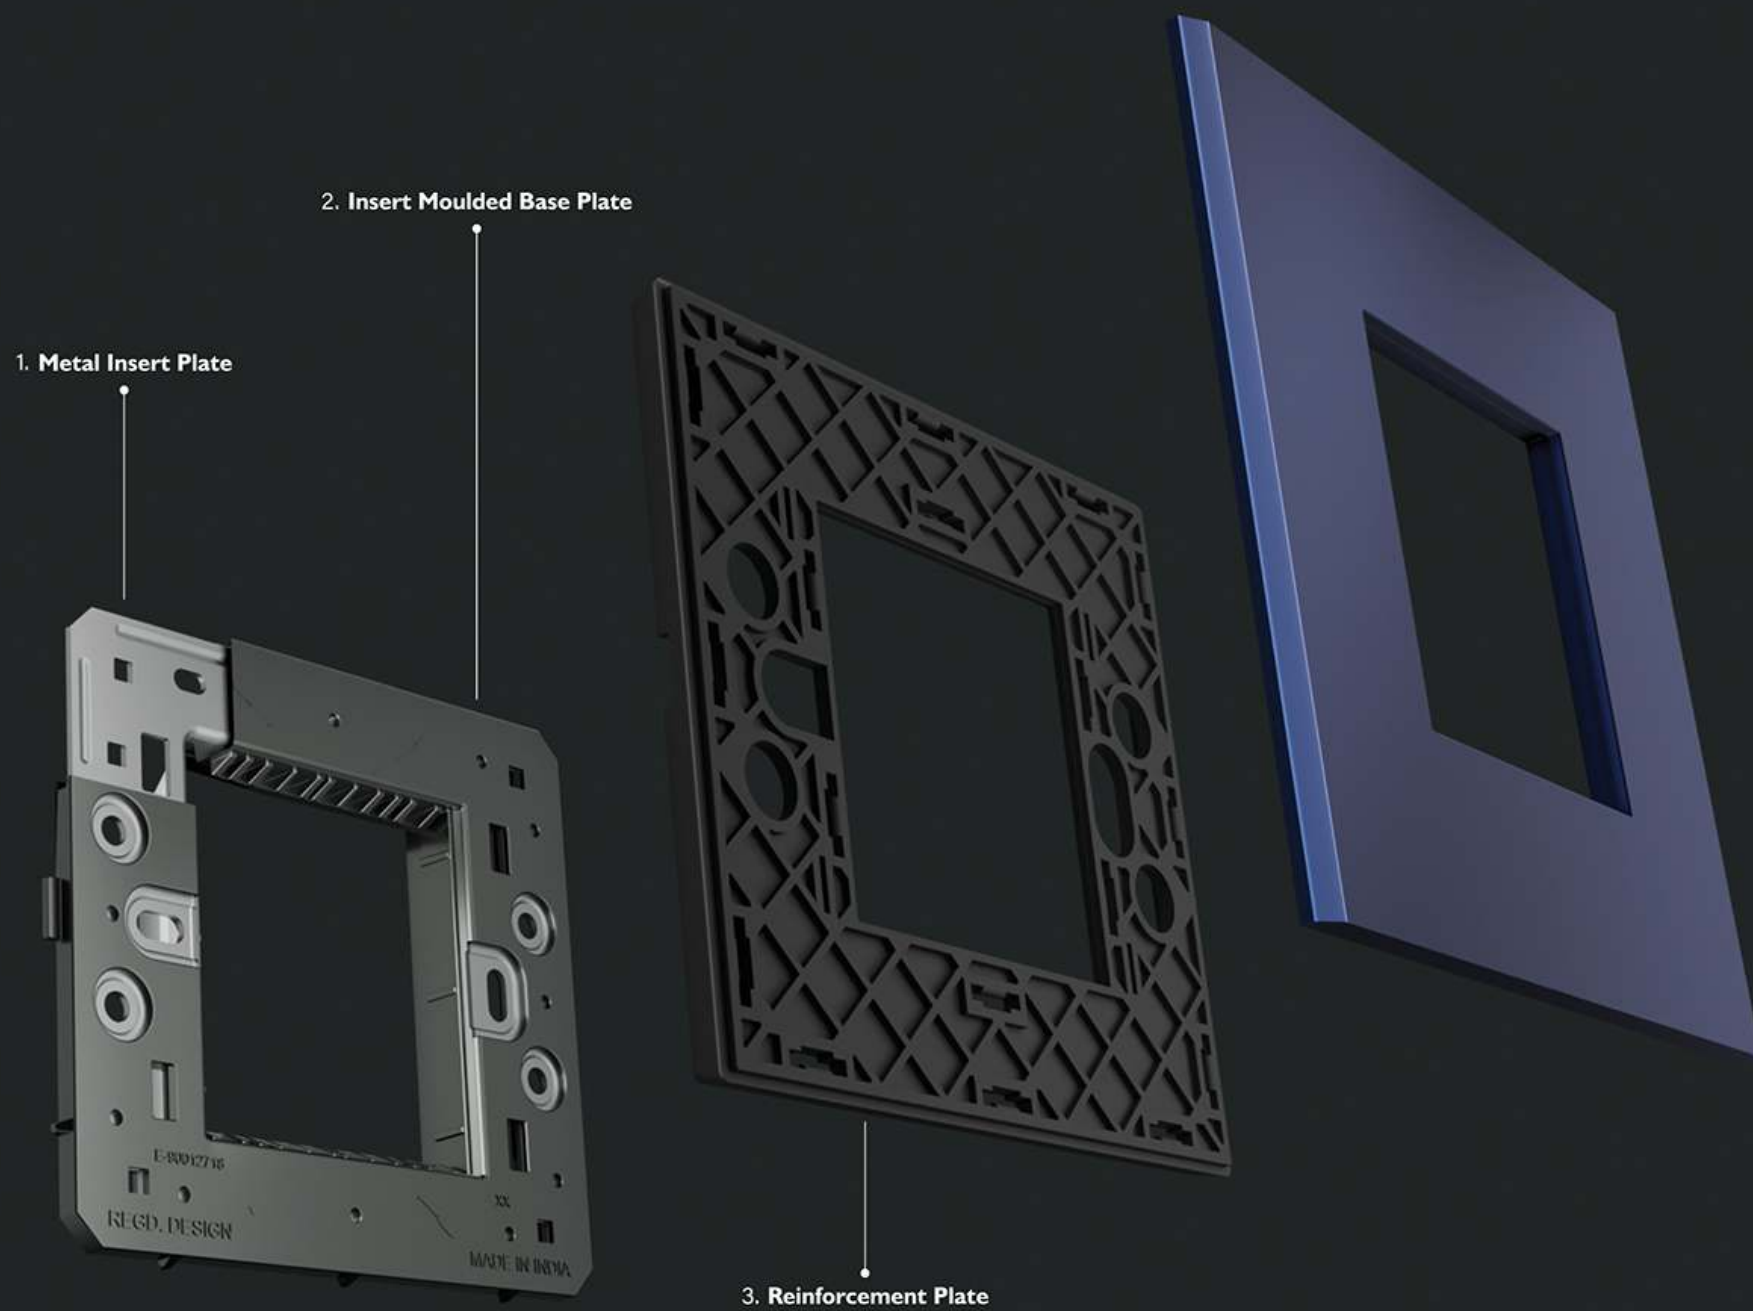

THE COVER PLATE DESIGN

Strength Beneath the Surface.

Beyond the elegant finish lies reinforced engineering that ensures perfect alignment, stability and long-term durability.

- 1. Metal Insert Plate:**
The metal insert plate is galvanized to protect it from corrosion.
- 2. Insert Moulded Base Plate:**
A sturdy metal plate fused with high-grade engineering plastic to improve insulation and adds structural strength.
- 3. Reinforcement Plate:**
Adds an extra layer of support to the front fascia, preventing any warping and ensuring long-term shape retention.

SAFETY

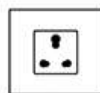

SWITCH-ON-SWITCH PROTECTION

The switch stays separated from live parts, reducing any risk while operating the switch.

AX RATED SWITCHES

As per the latest BIS guidelines, it is mandatory to have switch AX marked, our switches are marked AX. Also confirms to the forthcoming BIS guidelines, which state that the product should confirm to SBL guidelines.

DOUBLE SAFETY SHUTTERS

Our 3-pin sockets have two independently operated shutters, making them safe for both 2-pin and 3-pin plugs.

INSTALLATION

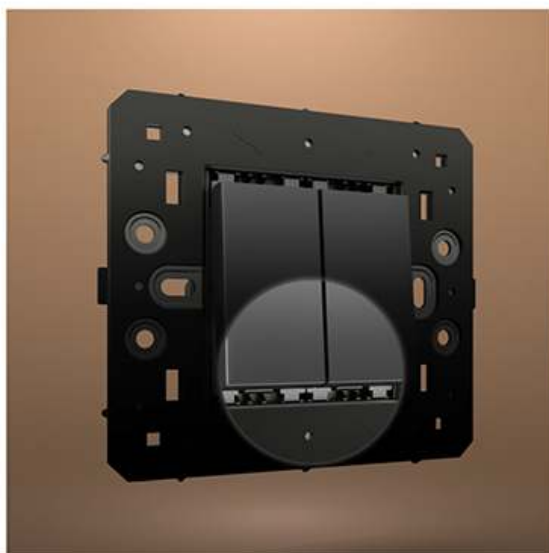

Simple to Install. Strong in Performance.

Every detail is thoughtfully designed to make the installation process faster, smoother and more secure ensuring a perfect fit that lasts over time.

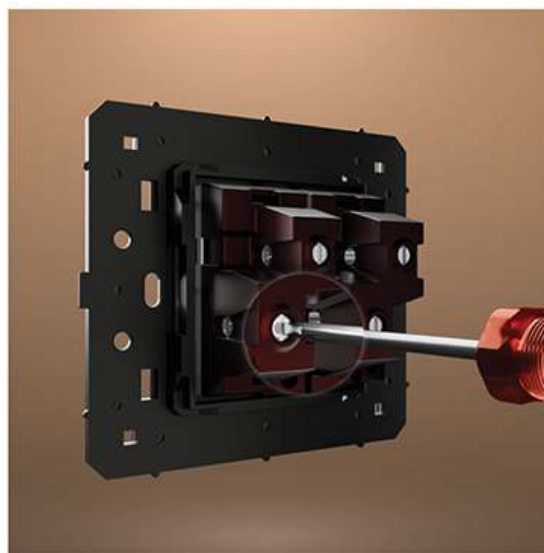

ENHANCED LOCKING MECHANISM

These two guiders on the product provide easy and precise locking.

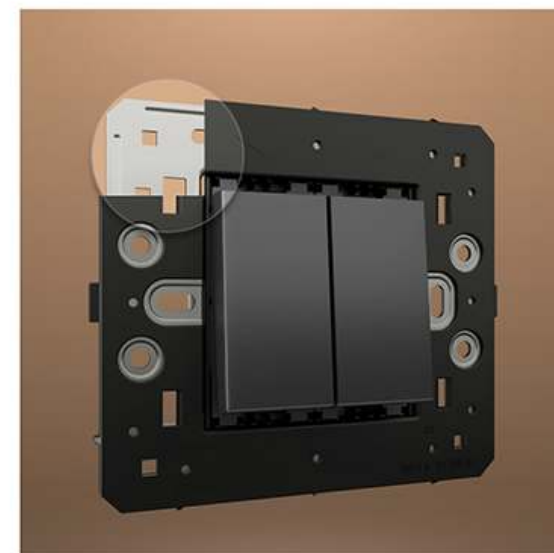

CAPTIVE SCREWS

Specially designed screws stay securely attached even when loosened it eliminates the risk of misplacement of the screws during installation.

INSERT MOULDED PLATE

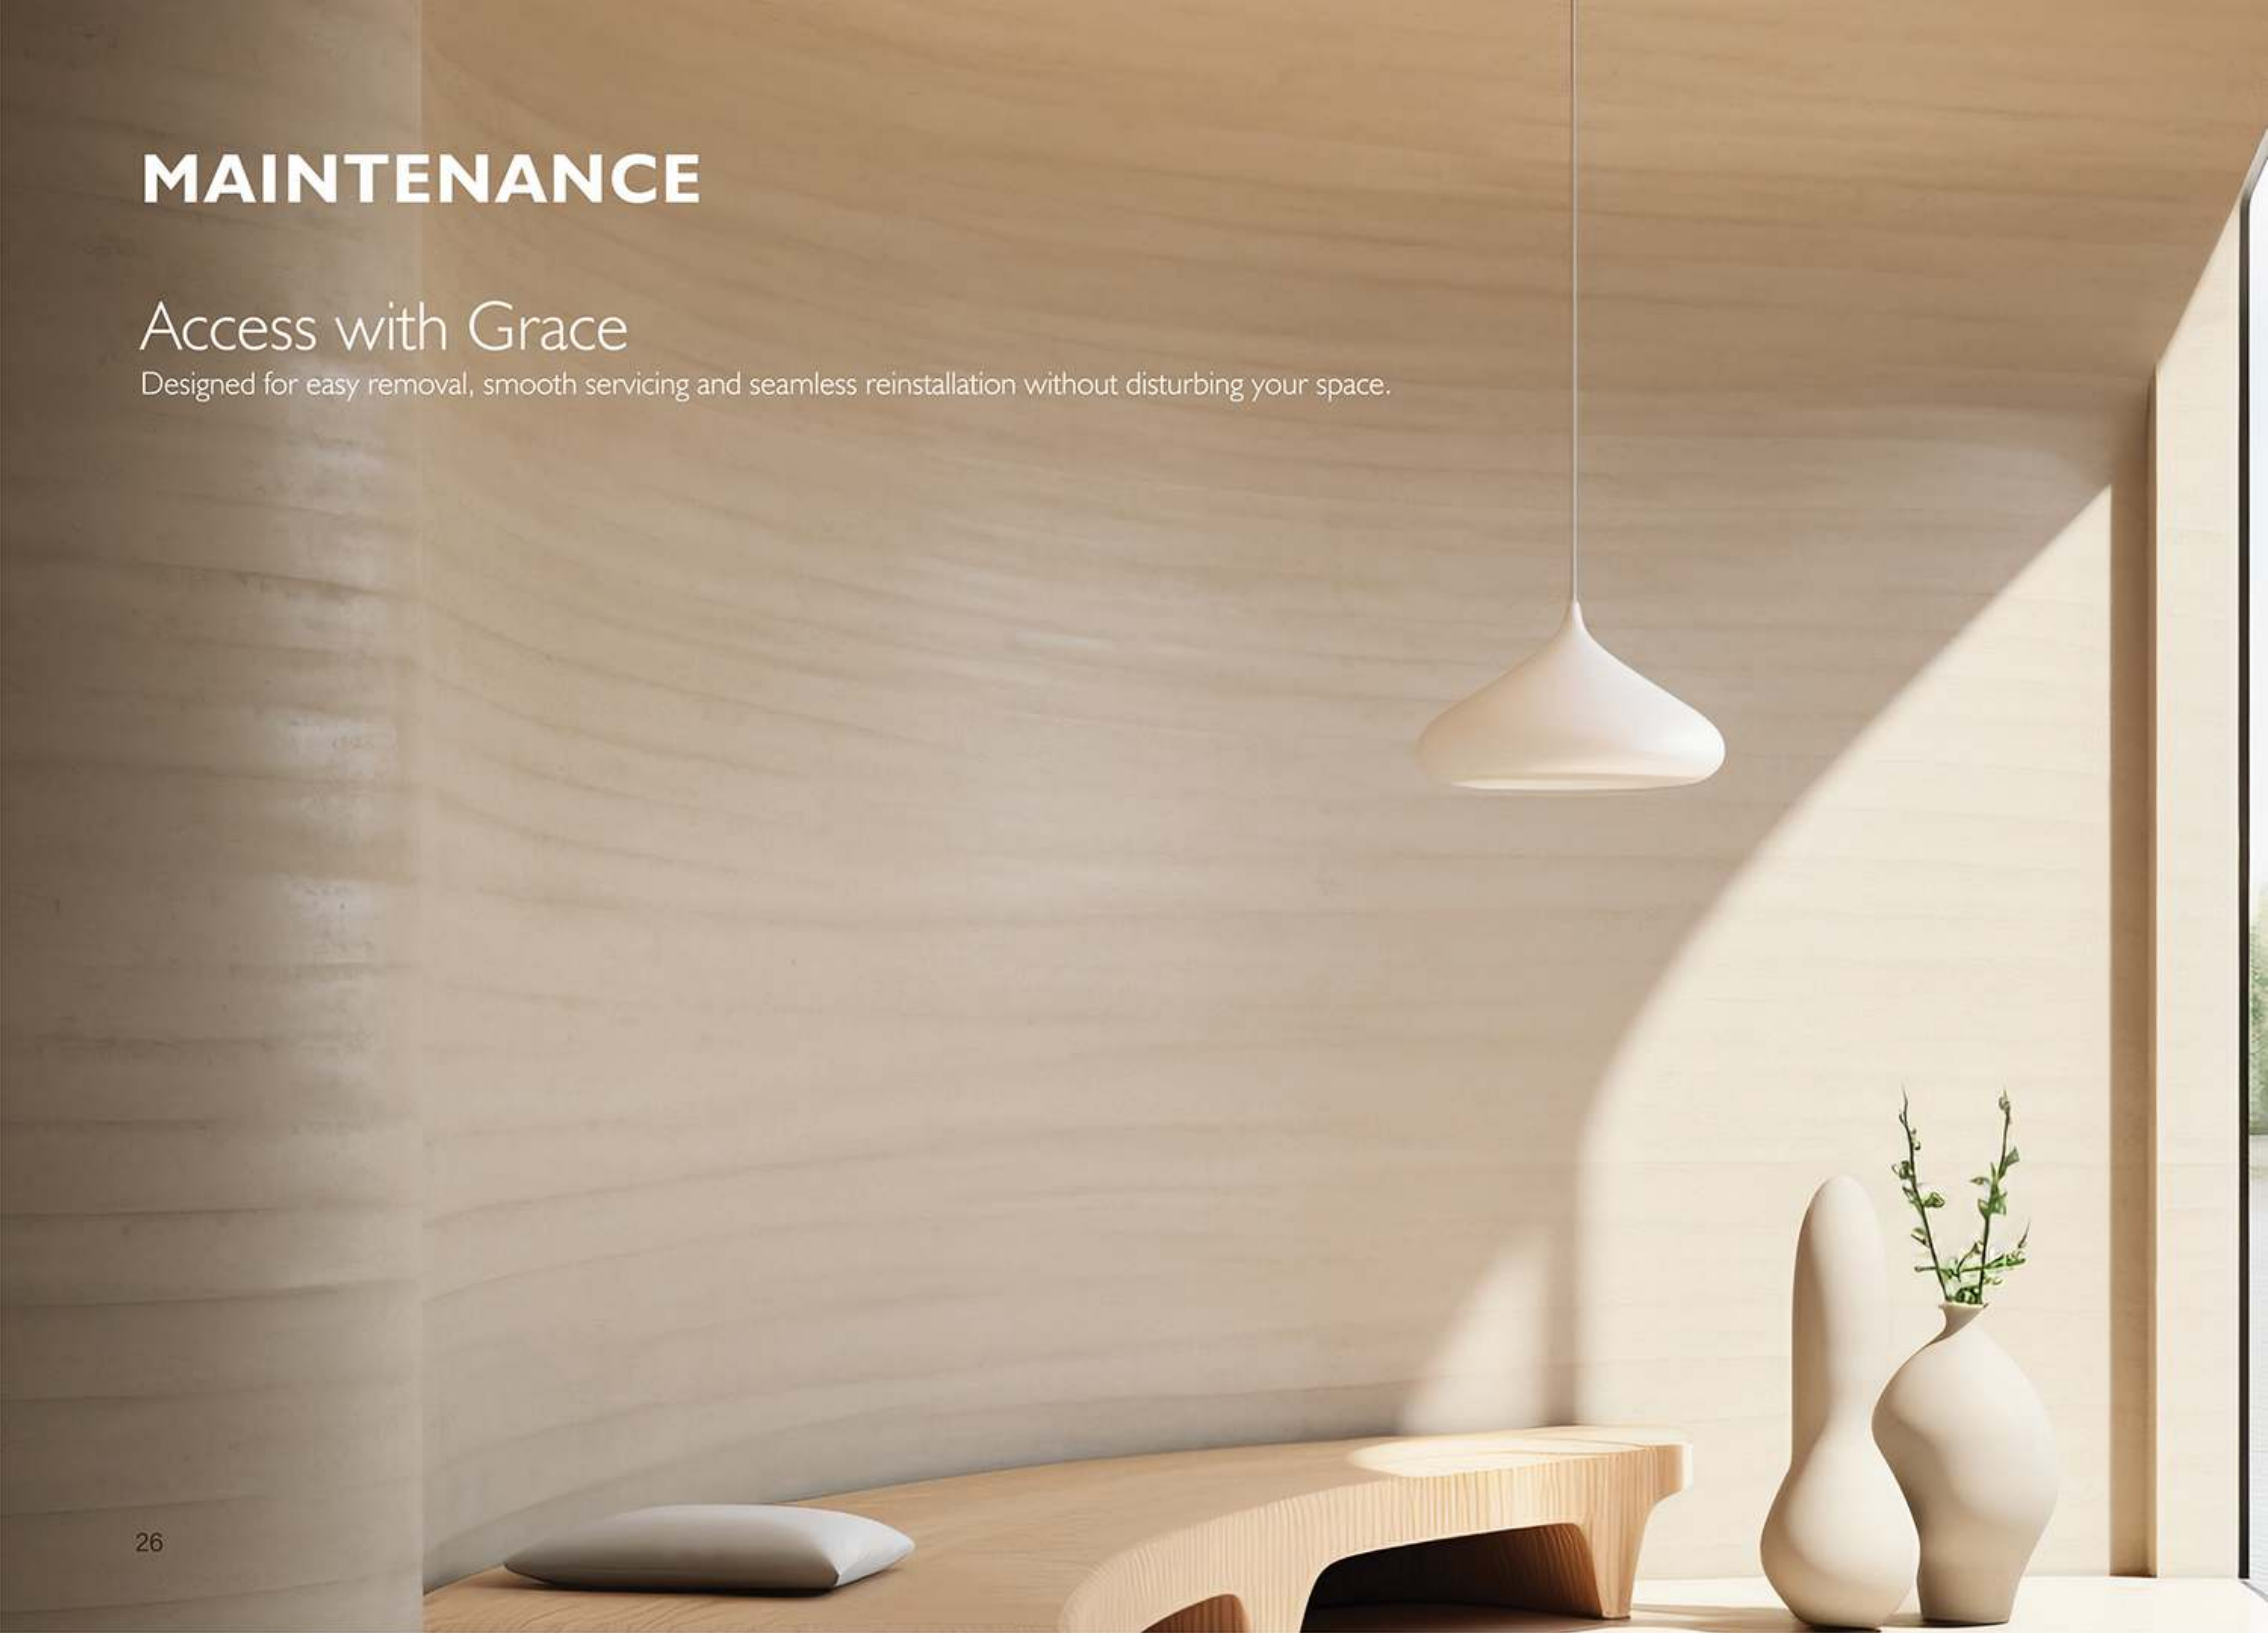

The added strength of the insert moulded base plate ensures a flat, stable surface that fits perfectly every time.

MAINTENANCE

Access with Grace

Designed for easy removal, smooth servicing and seamless reinstallation without disturbing your space.

EASY PLATE REMOVAL

Side slot are optimum sized ensuring easy removal of plate using screw drivers.

INSIDE LOCKING

Internal-facing locks allow the plate to be detached with minimal effort.

FRONT UNLOADING

Switches and sockets can be easily accessed and removed from the front, making maintenance and reinstallation quick and hassle-free.

Built for Everyday Luxury

A curated range of essential products that combine seamless function with elegant design crafted to elevate the everyday experience in every space.

PRODUCT RANGE

Switches

From elegant knob profile to silent mechanisms, explore options that blend technology with elegance crafted to suit every interior and every lifestyle.

Sockets

Designed with double shutters and silver-coated terminals, our range balances safety and style for both residential and commercial spaces.

Regulators and Dimmers

Whether you're adjusting fan speed or softening the light, Belezza's range of regulators and dimmers gives you control with finesse.

Accessories and Communication

With multiple configurations and seamless compatibility, you can personalize your space while keeping it efficient and future-ready.

Hospitality

Created to elevate the guest experience, our hospitality range it is designed for elegance, intuitive use and easy maintenance. Perfect for hotels, suites and smart living spaces that put comfort first.

Safety

Our safety product range ensures reliable electrical protection for residential setups featuring high-performance MCB's and motor starters that guard against overloads and short circuits with precision and durability.

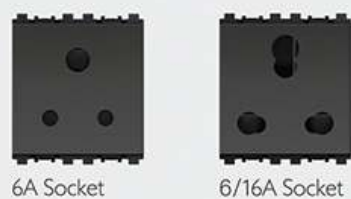

Crafted to Perform, Built to Last

A curated collection that blends thoughtful design with purposeful function. From switches and sockets to safety and hospitality solutions, each product in the Belezza range is made to elevate everyday living where beauty meets utility, seamlessly.

SWITCHES & SOCKETS

Our switches feature switch-on-switch technology, offering an added layer of safety and smooth operations with every press. Sockets are designed for smooth and secure operation of both 2-pin and 3-pin plug tops ensuring safety without compromise.
